Forecast for Tuesday 29 Sep 2020

Weather: Rather cloudy and damp overnight, however the rain should have ceased during the early hours, with cloud breaking and lifting clear of the peaks, soonest in the west to perhaps allow a grass frost in places here. Fine by day, with fair weather cloud developing in sunny spells, with a pleasant feel in sunshine given the light wind. Becoming cloudier from the west during the evening, with temperatures dropping quickly in the valleys.

Chance of cloud free mountain/hill tops above 600m: Soon improving to greater than 90 percent as cloud lifts clear of the peaks.

Visibility: Poor during the early hours, but soon improving to very good in fine conditions following.

Forecast for Wednesday 30 Sep 2020

Weather: Fine and potentially frosty in some sheltered spots at first in the light wind. Brightest during the first part of the morning, with high cloud soon thickening and invading from the west ahead of a wetter and windier afternoon.

Maximum wind: Increasing southeasterly 40, later southwesterly.

Chance of cloud free mountain/hill tops above 600m: Greater than 90 percent, falling to 20 percent during the afternoon as blanket cloud down to 500 metres spreads in. More broken cloud developing below this in rain later.

Visibility: Locally poor in isolated mist patches first thing, otherwise very good deteriorating to moderate in rain later.

Temperature: **Valleys:** Plus 2 becoming plus 14 degrees Celsius.

At 600m: Plus 9 Celsius.

Freezing level: Well above the summits.
